AEM Course Online Curriculum

Learning Objectives : Learn how to install AEM and deploy options, How to manage console and administrative interfaces, How to use CRXDE Lite and develop environment, How to create templates and page rendering components, By creating pages, install using CRXDE, How to render page specific content.

Topics Include : Product and Platform Architecture. , AEM Installation. , Deployment Options. , Consoles and Administrative Interfaces. , Using the CRXDE Lite embedded development environment , Creating and using templates and page-rendering components , Creating pages , Installing and using CRXDE , Rendering page-specific content

Practicals Covered : Hands on installation of AEM and deploy options, By creating pages and using templates with different scenarios find CRXDE embedded environment development. Install CRXDE and try to render page content.

Learning Objectives : Learn about apache sling concepts and component inheritance, How to use templates and concepts, How to design in AEM designer, How to use APIs for dynamic navigation, ExtJs, Dialogs, and taking input from authors and Design dialog's.

Topics Include : Apache Sling concepts , Inheritance and component hierarchy , Template and Content re-use concepts , AEM Designer , Using APIs for dynamic navigation , ExtJs, Dialogs, and taking input from authors and Design dialog's.

Practicals Covered : Hands on the Apache sling and component inheritance, The templates and Content re-use concepts, Work on the AEM Designer and use APIs for dynamic navigation and few extensions like ExtJs, Dialogs, and taking input from authors and Design dialog's.

Learning Objectives : How to customize the components and supporting Drag-and-Drop from Content Finder, what is complex component and search concepts by creating custom widget.

Topics Include : Customizable Components , Supporting Drag-and-Drop from Content Finder , Complex Components , Persistence Managers , Search Concepts , Creating a custom Widget

Practicals Covered : Hands on customizing components and supporting for Drag-and-Drop from Content Finder and learn about complex, persistence, Search Concepts by creating a custom widget.

Learning Objectives : Learn about OSGi bundles, workflow basic steps and know about AEM Packages and performance optimization concepts.

Topics Include : OSGi bundles , Workflow basics , Custom workflow process step , AEM Packages , Performance optimization concepts

Practicals Covered : Define AEM Packages by following custom workflow process steps and OSGi bundles for workflow.

Learning Objectives : How to publish a page in AEM and learn to create your own text with image component, Xtypes, Bundle.

Topics Include : Publishing a Page in AEM, Create your own text with image component, Xtypes, Bundle

Practicals Covered : By publishing the page in AEM designer create some text of your own to see the results with Xtypes & Bundle.

Learning Objectives : Learn how to tag an API and integrate with external database, what is AEM application structure and How to create a website using AEM.

Topics Include : Tagging API, Integration with external database e.g. My SQL, AEM Application Structure, Create a website using AEM

Practicals Covered : Hands on tag creation with an example integration of some external database e.g. My SQL and define the AEM application structure by creating the website using AEM.

Learning Objectives : Learn what are JSP Tag Libraries and its designs and designer, How to personalize in detail. How to create custom reports and reporting.

Topics Include : JSP Tag Libraries, Designs and the Designer, Personalization in Detail, Reporting, Report Customization, Create Custom Reports

Practicals Covered : Work on JSP Tag Libraries and design a report using custom modifications on reports and generate the reports.

Learning Objectives : Learn how to work on workflow console by following workflow steps and following AEM Workflow Terminology and Authorization and use of Existing Workflow, Custom Workflow.

Topics Include : AEM Workflow Console, Types of Workflow Steps, AEM Workflow Terminology, AEM Workflow Authorization, Use Existing Workflow, Custom Workflow

Practicals Covered : Hands on using Existing Workflow, Custom Workflow with experiencing the AEM Workflow Console and their types and terminology for authorization.

Learning Objectives : Learn how to create own widget xtype and create a simple widget, Learn about Logger, Debugger, Internationalization (i18n).

Topics Include : Logger, Debugger, Create Your Own Widget XTYPE, Create a Simple Widget, Internationalization (i18n)

Practicals Covered : Hands on logging and debugging of XTYPE. Create own XTYPE Widget & create with simple widget for Internationalization.

Learning Objectives : Learn how to use dispatcher and implement caching, How to setup dispatcher and perform different caching process. Learn how cluster works and its architecture/configuration.

Topics Include : Why Use the Dispatcher to Implement Caching, Typical Dispatcher Setup, How the Dispatcher performs Caching, How Cluster Works, Cluster Architecture/Configuration

Practicals Covered : Hands on using dispatcher implement caching and use setup the typical dispatcher for creating dispatcher caching and perform actions on cluster and its architecture & configuration.

Tekslate basically offers the online instructor-led training. Apart from that we also provide corporate training for enterprises. Our trainers have relevant experience in implementing real-time solutions on different queries related to different topics. Tekslate also verifies their technical background and expertise.

We record each LIVE class session you undergo through and we will share the recordings of each session/class.

If you have any queries you can contact our 24/7 dedicated support to raise a ticket. We provide you email support and solution to your queries. If the query is not resolved by email we can arrange for a one-on-one session with our trainers.

You will work on real world projects wherein you can apply your knowledge and skills that you acquired through our training. We have multiple projects that thoroughly test your skills and knowledge of various aspect and components making you perfectly industry-ready.

Our Trainers will provide the Environment/Server Access to the students and we ensure practical real-time experience and training by providing all the utilities required for the in-depth understanding of the course.

If you are enrolled in classes and/or have paid fees, but want to cancel the registration for certain reason, it can be attained within 48 hours of initial registration. Please make a note that refunds will be processed within 30 days of prior request.

Yes. All the training sessions are LIVE Online Streaming using either through WebEx or GoToMeeting, thus promoting one-on-one trainer student Interaction.

There are some Group discounts available if the participants are more than 2.

As we are one of the leading providers of Online training, We have customers from:

Popular cities of USA, like:

- New York, Los Angeles, Chicago, Houston, Phoenix, Philadelphia, San Antonio, San Diego, Dallas, San Jose, Austin, Jacksonville, San Francisco, Columbus, Indianapolis, Fort Worth, Charlotte, Seattle, Denver, El Paso, Washington, Boston, Detroit, Nashville, Memphis, Portland, Oklahoma City, Las Vegas, Louisville, Baltimore, Milwaukee, Albuquerque, Tucson, Fresno, Sacramento, Mesa, Kansas City, Atlanta, Long Beach, Colorado Springs, Raleigh, Miami, Virginia Beach, Omaha, Oakland, Minneapolis, Tulsa, Arlington, New Orleans, Wichita, Cleveland, Tampa, Bakersfield,

- Toronto, Montreal, Vancouver, Edmonton, Hamilton, Ottawa, Calgary, Ontario, Qubec etc

Popular cities of India, like:

- Adobe Experience Manager Training in Hyderabad, Pune, Bangalore, Chennai, Delhi and Mumbai, Adobe Experience Manager Training India.

Along with it, we also prevail our valuable online training in the places of UK, Australia, India and other parts of the world

The AEM consists of 5 different modules: Assets, Sites, Forms, Mobile, and Communities. Making use of all these modules will be able to offer user an all-inclusive content management solution for building mobile apps, websites, including forms to help manage your marketing content and assets more efficiently.

Some of the prominence of the AEM:

1. Build and manage all your mobile sites and responsive designs from just a single Adobe platform.

2. Sites has the instrument for the optimization of shopping carts, sync product information from other systems for example your e-commerce platform, and also make pages from catalog data.
3. The AEM is important for organizations that want to manage different sites across a lot of regions. With Sites, one can easily control them from a unified place.
4. AEM Training offers the capability for you to launch and manage marketing campaigns from a principal location. You are also able to organize and store your resources in Sites for easy access and make use of them for all your operations.

The server of AEM demo is platform independent as it is based on Java. AEM is also based on Apache Sling, Apache Felix (OSGi), Technically, AEM Training is an integration of both application-level as well as infrastructure-level functions. At the application-level, AEM enables users to manage content, mobile apps, digital assets, websites, e-commerce, social communities and more. However, at the infrastructure-level, it can be deployed in a standalone mode or as a web application in third-party server; the Sling Web Application Framework of AEM reduces the overhead of developing content-oriented applications for AEM developers; and can store all the data from an author as well as code from a AEM developer of a website on its Java Content Repository (JCR) database. Adobe Experience Manager also use HTML5 technology to offer high-end visualization of a website.

Features of Adobe AEM Training Online

- Web Content Management, including in-place editing of content, workflow, localization, personalization. etc.
- Marketing Campaign Management that can segment visitors for push marketing
- Mobile web experiences and you can preview your site in many different mobile simulators

- Targeting which integrates Adobe's online marketing suite powered by Omniture
- Social Collaboration such as profiles, wikis, forums, blogs, etc.
- Digital Asset Management with easy access from the content editing screens
- Portal integration can easily surface content on a portal or include JSR portlets on a content page
- Forms Builder to create forms for the site

We will go through in detail about each and every feature in the AEM online training classes.

AEM Training Certification

Adobe Certified Expert (ACE) certification is designed to help prepare partners, customers, and consultants who are actively seeking accreditation.

- Having Adobe certification distinguishes you as an expert.
- For Adobe certification, you need not go to a test center, as the certification is available online.
- You need to register yourself at **Here** (<http://www.pearsonvue.com/adobe/>) to give your “Adobe” (Adobe Developer) Exam.
